Confidential and sensitive information about faculty, other parents and/or children will not be shared with parents, as we strive to protect everyone's right of privacy. Confidential information includes, but is not limited to: names, addresses, phone numbers, personal records, disability information, and any health related information of anyone associated with Kidz Rock ELC.

Parents will be provided with a document detailing the information that is to be shared outside of Kidz Rock ELC, persons with whom the information will be shared, and the reason(s) for sharing the information.

Expulsion Policy

Unfortunately, there are sometimes reasons we have to expel a child from our program either on a short term or permanent basis. We want you to know we will do everything possible to work with the family of the child(ren) in order to prevent this policy from enforced. The following are reasons we may have to terminate or suspend a child from this center:

Immediate Causes for Expulsion

- The child is at risk of causing serious injury to other children or himself/herself.
- Parent/Guardian or Authorized family member threatens physical or intimidating or aggressive actions toward staff members.
- Parent/Guardian or Authorized family member exhibit confrontational behavior or verbally aggressive actions towards our Center of staff members at any time or on the premises of The Rock of Central Florida, including Kidz Rock ELC and The Rock Academy Campuses.

Promotion to Preschool Requirement – Potty Training

At our learning center, we prioritize the holistic development of our toddler students, with a specific emphasis on promoting independence, including successful potty training. Promotion to preschool is a significant milestone that is carefully determined by considering three key factors: successful completion of potty training, birthdate, and center availability. To ensure a smooth transition, toddlers will be eligible for promotion to preschool after they have successfully completed potty training. Additionally, center availability will be considered, ensuring that there are sufficient spaces in the preschool program to accommodate the transition.

Moreover, our dedicated staff will assess each toddler's readiness for preschool, ensuring that they have achieved the developmental milestone of potty training, a crucial step towards independence. By incorporating these considerations into our promotion policy, we aim to celebrate and support each child's individual achievements while fostering a positive and comfortable learning environment for their continued growth and development.

Promotion Factors:

- **Potty Training Success:** Promotion to preschool is contingent upon the successful completion of potty training.
- **Birthdate Eligibility:** The child's birthdate is also considered in determining the appropriate time for promotion.
- **Center Availability:** Availability of spaces in the preschool program is considered to ensure a seamless transition.

Developmental Readiness: Our staff assesses each toddler's readiness for preschool, including their achievement of the potty-training milestone.

Information and understanding regarding Biting

It's important to understand that biting is a relatively common phase in a toddler's development. Children are always learning to communicate and may resort to biting to express themselves when they lack the words to convey their feelings or needs. Another reason for biting in toddlers is their exploration of cause and effect. They may bite to see the reaction it elicits from others or to gauge the impact of their actions. Additionally, teething can contribute to the urge to bite to soothe their discomfort. It's crucial for parents to approach this behavior with patience and understanding, recognizing that it is a normal part of their child's development.

At Kidz Rock ELC, addressing biting behavior involves a strategic two-step approach. Firstly, careful observation and analysis of biting incidents help us identify triggers and patterns. Documenting specific situations provides valuable insights, enabling caregivers to understand the root causes and implement targeted interventions. Secondly, fostering open communication with parents is essential. We keep parents informed about biting incidents, sharing observations, triggers, and strategies. Collaborating with parents allows us to gather insights into the child's behavior at home, promoting a unified approach in managing and reducing biting. Concurrently, we actively engage toddlers in learning alternative ways to express themselves, emphasizing positive behaviors through praise and structured activities that encourage social skills and emotional regulation. We consider each child an individual and therefore, we evaluate every season of biting on a case-by-case basis.
